Professional Summary

Junior Back-End Developer with one year of practical experience in PHP and Laravel, including real-world projects and production-ready systems. Strong knowledge of MVC architecture, REST APIs, authentication, and database design. Seeking a challenging back-end position to add value and enhance technical expertise.

Education

Faculty of Computer & Information Sciences , Mansoura University
Bachelor of Engineering (B.Eng.) in Computer and Information Sciences.
Graduation Date: July 2025

Experience

Junior Backend Developer | PHP & Laravel
MetaForTech
May 2025 – Present

Projects

Oxford College ([live App](#)) ([Github](#))

- Built a Laravel e-learning platform with course browsing and online booking with payments.
- Created role-based dashboards for admins, trainers and trainees, with course and evaluation management.
- Built AI-powered support using ChatGPT for Q&A and interactive learning assistance • Integrated notifications (email & in-app) and Zoom for live interviews and sessions • Designed admin reporting tools for tracking users, payments, revenues, and platform activities • Integrated ClickPay payment gateway using REST APIs.
- Designed and implemented a **quiz system** with questions, answers, and score calculation.

Alshboul Law App ([live App](#)) ([Github](#))

- Built a Laravel law firm management system with role-based dashboards for admins, lawyers, and

client

- Implemented full case lifecycle management including cases, tasks, settlements, agreements, and job postings.
- Built advanced features such as global search, real-time chat, notifications, mission alerts, and archive management with restore options.
- Designed a client portal for submitting cases, tracking progress and applying for job opportunities.
- Emphasized security and permission control to ensure reliable multi-role access and system integrity.
- Designed and implemented an archiving system using soft deletes

Viedma Site ([live App](#)) ([Github](#))

- Developed an educational platform integrating e-commerce and school management.
- Developed an admin panel to manage schools, users, agreements, and role-based permissions.
- Built a digital store for selling educational games linked to student levels.
- Developed dashboards with Excel data imports, student evaluations, and project management.
- Designed parent portals (web & mobile) for tracking student performance and purchases.
- Built a teacher training (TOT) module with courses, assessments, and certification workflow.
- Integrated ClickPay payment gateway using REST APIs.

***Shop&More* ([live App](#)) ([Github](#))**

- Designed a multi-tenant system with super admin and tenant dashboards.
- Implemented **voucher generation and redemption system** for beneficiaries.
- Role-based access control (Super Admin, Charity Admin, charity Sub-admin).
- Secure voucher validation and usage tracking.
- Integrated (Paymob - Stripe - Paypal - Razor Pay - Paytabs) payment gateways using REST APIs
- Implemented orders and cart with coupon and voucher redemption for products.

Technical Skills

Backend: PHP, Laravel, REST APIs, OOP, MVC

Database: MySQL, SQL

Frontend: HTML, CSS, Bootstrap, Tailwind, JavaScript

Tools: Git, GitHub, Postman

Concepts: SOLID, Design Patterns, Authentication, Authorization

General Skills

Postman – Problem Solving – Git – Github - Communication - Teamwork

Languages

Arabic: Mother Tongue. **English:** Very Good.
