MetaForTech

May 2025 – Present

Projects

Project Name: Oxford College ([live App](#))

- Developed a full-stack e-learning platform using Laravel, featuring course browsing, search & filtering, and online booking with integrated payments.
- Implemented role-based dashboards for admins, trainers, trainees, and institutes with course management, scheduling, certifications, and evaluations.
- Built AI-powered support using ChatGPT for Q&A and interactive learning assistance. - Integrated notifications (email & in-app) and Zoom for live interviews and sessions. - Designed admin reporting tools for tracking users, payments, revenues, and platform activities.

Project Name: Alshboul Law App ([live App](#))

- *Developed a comprehensive law firm management system using Laravel with role-based dashboards for admins, lawyers, and clients.*
- *Implemented full case lifecycle management including cases, tasks, settlements, agreements, and job postings.*
- *Built advanced features such as global search, real-time chat, notifications, mission alerts, and archive management with restore options.*
- *Designed a client portal for submitting cases, tracking progress, and applying for lawyer job opportunities.*
- *Emphasized security and detailed permission control to ensure reliable multi-role access and system integrity.*

Project Name: Viedma Site ([live App](#))

- *Developed a comprehensive educational platform integrating e-commerce, school management, teacher training, and parental engagement.*
- *Built a digital store for selling educational games linked to student levels. Implemented school and teacher dashboards with Excel-based student imports, evaluations (activity, behavior, interaction), and recognition features with project uploads.*
- *Designed parent portals (web & mobile) to track student performance, view evaluations, and – purchase educational games with delivery/payment options.*
- *Created a TOT (Training of Trainers) module for teacher certification, including courses, graduation projects, Zoom meetings, assessments, and certificate issuance. Developed an admin panel for managing schools, teachers, users, agreements, and permissions with a strong focus on role-based access.*
